

Comment on MB Docket #04-233

PLEASE DO NOT ALLOW Low Power FM to override the current national FM wavelenghts. The ONLY Christian music I receive is from K-LOVE which exists only through the national FM process due to the large costs associated with getting such a POSITIVE AWESOME MESSAGE of hope and love so desparately needed in todays world. This is especially true for kids who are bombarded with anything goes media!! Without this positive message, little secluded towns/cities like Santa Cruz would not have access to this great music. This positive alternative is the only place many kids and adults hear about love and hope!! Even here in Santa Cruz, the hub of moral freedoms without limitations, I often hear K-Love playing in public places. To lose this unmeasurable yet absolutely vital piece of our decreasing choices would be very sad and would destroy one more piece of the fabric that makes America the greatest country in the world.
